HAVERHILL TOWN COUNCIL – RE SQUADRON ISO CONTANTER

Dear Sirs,

Following your generous donation to the Squadron of £3,500, we have now completed the acquisition and installation of the new ISO Container.

The ISO Container has allowed us to free up space in the main Squadron building creating an entirely new teaching space (pictures attached). In addition, space has been created at the end of the Squadron building around the Flight Simulator (pictures attached) which allows more cadets to receive instruction simultaneously.

Following the Town Council's previous donation towards the Squadron Flight Simulator, I am pleased to inform you that two cadets have completed the Regional Aviation Course (allowing them to bid for places on the Air Cadet Pilot Scheme ("ACPS")) and one of these cadets has been accepted onto the ACPS.

The only task remaining with the ISO Container is to install the racking to allow even more storage.

We are currently looking at expanding the Squadron's ability to provide new cadets (aged 12 – 14) with an externally awarded BTEC Qualification to recognise the leadership and team work skills they develop in their first few months with us.

Another aspect of our training we are developing is the Duke of Edinburgh Award Scheme. One of the staff team is currently training to be a Lowland Leader and DofE Assessor. We are hoping to be updating our Expedition and DofE equipment stores over the coming months.

The Squadron would gladly welcome any member of the Committee to attend on a Parade night to see the Cadets in action and see how your donations have benefited the young people in our charge.

Yours faithfully,

Nathan Young BSc ACA
Flying Officer
Royal Air Force Air Cadets
1451 Haverhill Squadron
Officer in Charge
